EXPERIENCE

APP DEVELOPMENT INTERN DEC' 15 EngineerBabu Inc.

Collaborately worked with Senior Android Developers on MotorBabu App - vehicle service booking app. Created the currently used login/signup system, and many internal pages/activities of the app. Learned about various API calls and methods in Android, and how to fetch or send data to the remote servers.

LEAD APP DEVELOPER MAY' 16 VOLOC

VOLOC is an Online learning portal providing e-learning with video lectures, quizzes, and Documentations. Lead a team of 8 Android Developers to collaboratively build VOLOC's Android app on Github. Created the base activities/pages along with UI/UX of app and other key architectural aspects.

UI/UX DESIGNER JUN' 16 FCut

FCut is an Augmented Reality based application that helps user to try new hairstyles with hairstyle image overlays. I designed and created the UI/UX of the app following comprehensive material design philosophy.

PROJECTS

DERT, Doctor's Emergency Rescue Task App Co - Founder & Android Developer

Cross-platform emergency SOS app for doctors. Created DERT's Android App along with designing UI/UX of both android and iOS app. It got accepted by Indian Medical Association & is currently used by more than 150 Doctors. Multithreading, GCM - push notification, Runtime Permissions (6.0+).

Cambuzz, Open Source Networking Platform Lead Android Developer

Centralized information system, with track teacher feature and in campus Q/A forum. Lead android team and created cambuzz's android client - predominantly building the cambuzz-live-feed. Successfully used by 1600+ students. API calls (Volley), SQLite services, and Push Notifications.

Aurum, Personal Healthcare Assistance App Android Developer

Tracks diseases and displays nearby health centers. Created existing login/signup system, along with UI/UX of the app, and integrated Maps API. AsyncTasks, Google Map API, Disease Mapping Algorithm.
